DevOps - TrafficStars

Limassol, Cyprus

Every day our advertising network registers over 6 billion events using 300 servers located in 5 data centres in Europe and the United States. During peak hours the load reaches over 700 thousand requests per second. The ClickHouse cluster has a total size of 1.2 petabytes. At the same time the whole system works like a Swiss watch, made possible only thanks to a team of smart, talented and proactive people. We are looking for real professionals ready to implement new and ambitious plans with us, which will allow us to keep providing the best service for our clients. Due to the growth of the IT department, we are opening a vacancy for the position of DevOps. The vacancy implies a relocation in Limassol, Cyprus and full official employment (whole family relocation is available). Southern Europe (sun, sea, fruits), ecology, safety and a huge Russian-speaking IT community.

Tasks:

Development and support of IT infrastructure in a highly loaded geo-distributed project;

Ensuring the smooth operation of infrastructure and services;

Setting up assembly, testing and deployment pipelines;

Process automation;

Maintenance of PostgreSQL, Clickhouse, Kafka, Aerospike clusters;

Creation and operation of various environments from testing to production;

Identification of potential problems and participation in the creation of solutions to eliminate them;

Search, testing and implementation of new solutions that help optimize current processes and improve the quality of services provided.

What will you work with:

Highly loaded system, handling up to 600 K Rps;

Clickhouse cluster processing petabytes of statistics data;

Infrastructure built on the principle of Infrastructure as code;

CI / CD built with Gitlab-CI;

Bare metal, VM, Cloud.

START

Requirements:

Linux;

Docker;

Nginx;

ClickHouse, PostgreSQL, Redis, Aerospike;

Experience with Kafka message brokers;
